01 Fourier MTF 4

System Summary

Configuration 1

System Parameters	Value
Source File	Unsaved Project
EFL / mm	49.9998
F/#	5
TTL / mm	60.1768
Entrance Pupil Diameter / mm	10
Field Coordinate	(0, 0)；(0, 14)；(0, 20)
Wavelength	480 / 550 / 650 nm
Calculation Time	2026-11-10 02:13:22 +08:00

All figures and values use the same project snapshot captured at export start. Each analysis uses the selected settings; parameters and original output are retained in the calculation records.

01 Fourier MTF

Sampling strategy: Refine when needed • Validation/adaptive sampling limit: 2048 • Sampling: 64 • Wavelength: All • Field: All

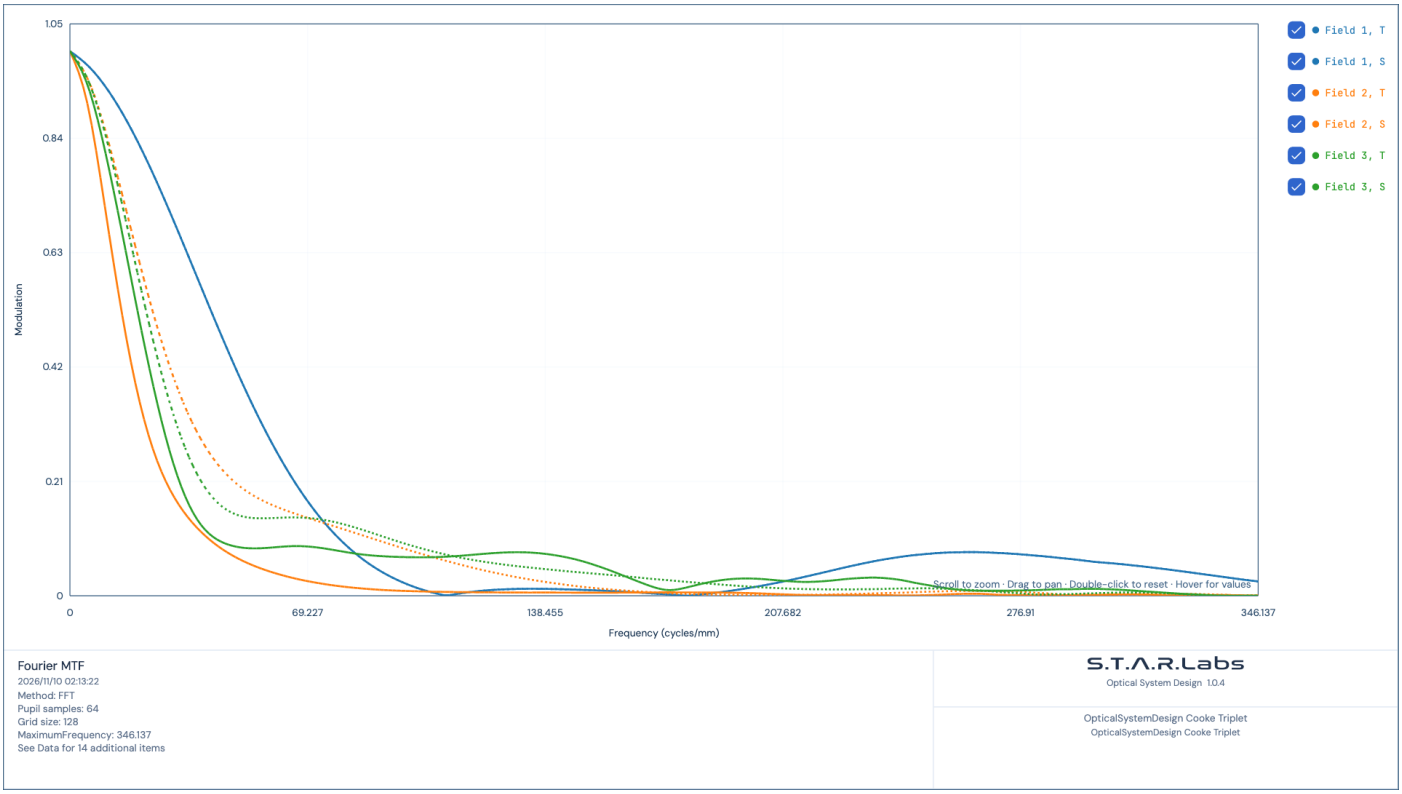

Figure 1 Fourier MTF

Cutoff Frequency (cycles/mm)	Method	Pupil samples
346.137	FFT	64
